But we do much more...

 Open Regulatory Compliance

About ▾ Membership ▾ Participate Resources ▾ Get involved

wondering how the CRA applies to you. CRA reporting requirements will become applicable on 11 September 2026, with all requirements taking effect on 11 December 2027 – so it's important to begin preparing now.

Counting down to CRA compliance

Starting 11 September 2026, manufacturers must comply with vulnerability reporting requirements. Other CRA deadlines also apply.

The screenshot shows the GitHub organization page for 'orcwg'. It displays various repositories such as 'Open Regulatory Compliance Working Group (ORC WG)', 'REMAP-HD', and 'Open Regulatory Compliance'. A prominent message on the main page reads: 'Welcome to the ORC GitHub organization - ORC is an Eclipse Foundation Working Group whose immediate focus is to help open source maintainers and users meet the compliance requirements of the European Cyber Resilience Act (CRA). The Cyber Resilience Act'.

How to Contribute to ORC Deliverables

Initial challenges (not so different from the ones we have today)

Improving our delivery capabilities through a larger team

Develop our relationship with multiple institutions

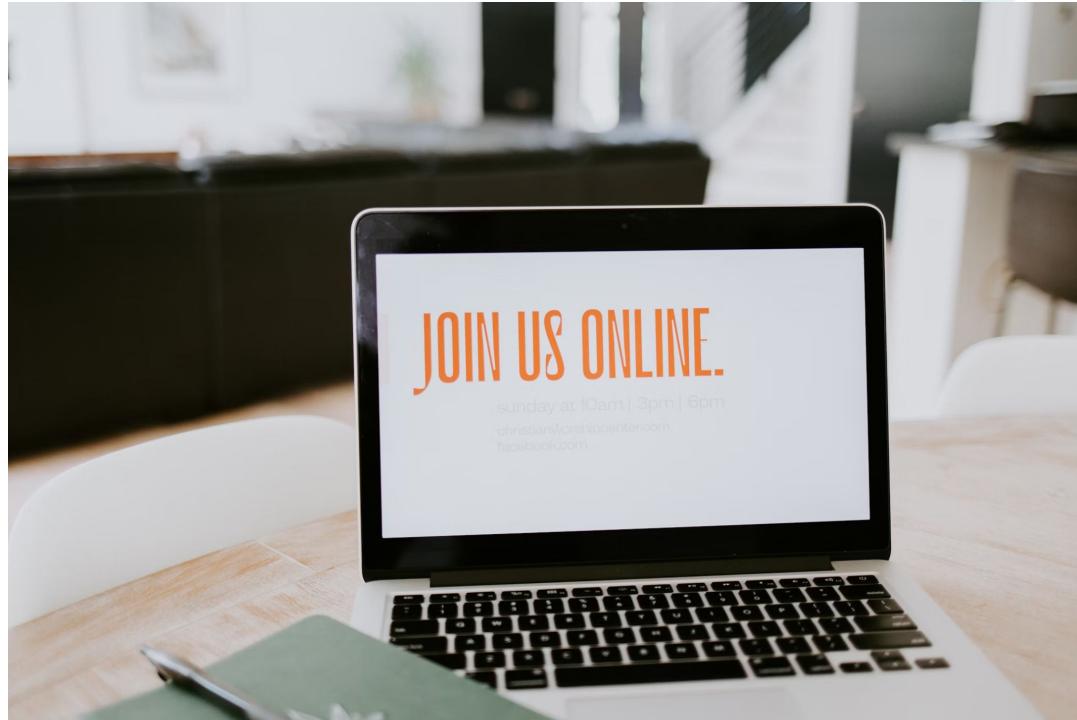

bitkom

CRA Training Program

- First steps with the CRA and open source
- Specific training for manufacturers
- Specific path for maintainers and stewards

Just one more thing ...

We have a Mascot

We want you to propose names for them!

The background of the slide features a sunset or sunrise over a dark silhouette of palm trees. The sun is a bright yellow orb at the top center, with rays of light extending downwards. The sky is a gradient of orange and yellow, transitioning into a darker blue at the bottom.

This is a community effort

We found out how to navigate these waters, but there are still plenty of challenges ahead of us

Communicate, communicate and communicate
