2026-07-02 ORC Steering Committee

Agenda

Agenda Topics	Moderator	Minutes
Approval of the minutes of the previous ORC Steering Committee call	Juan	2
ORC SC feedback document	Juan	30
Code and Compliance Fall 2026	Juan	10
CRA implementation status (Expert Group + Standardisation)	Juan & Dirk-Willem	10
AI Policy and Compliance SIG	Ciaran	5
AOB	Juan	3

Steering Committee document review

Steering Committee feedback document

Three main topics:

- Strategic membership value and financial sustainability
- Planning
- Comments to 2026 ORC Program Plan

Value proposition for strategic members

Governance benefits

- **Decision-making:** Active role on Steering and Specification Committees.
- **Priorities:** Aligning Working Group focus & Program Plan.
- **Operations:** Approving processes not covered in the EF governance framework.
- **Strategy:** Defining topic prioritisation and structure.
- Participate directly in **events program**.

Member meetings

- **H1 Updates:** Commenced structured update meetings with strategic members.
- How can we make it more useful for you?

Marketing & events

- **Comms & Articles:** Contributed articles and communication activities tailored to member capacity.
- **Proven Examples:** Solid collaborative frameworks already established .
- **Event tickets** for Code & Compliance].
- **Influence** on the events' program.

Financial sustainability

Strategic Members

2 new strategic members are currently going through the paperwork.

AI & Compliance

Opportunities derived from the new AI policy and compliance SIG.

Specific recruiting derived from it.

Sponsorships

Sponsorship opportunities for specific pieces of work like training materials.

Focus on sponsorships for event organisation.

Public Funding

We explore public funding opportunities to maintain and develop ORC activities

Planning

EF Staff

- **Juan** - PM
- **Ciaran** - Policy director and AI Policy and Compliance SIG
- **Mikael Barbero** - Stewards + CRA EG contributions
- **Shanda (Shabnam)** - Mkt Mgr
- **Natalia** - Digital marketing
- **Marta García** - Cooperation with institutions and organisations
- **Arina** - Events manager for ORC
- **Francisco** - Ecosystem development

Contractors

- **Tobie** - FAQ + governance
- **Olle** - Training Materials
- **Æva** - Attestations

Staff Allocation

Staff allocation is based on:

- Commitments from the EF when approving the Program Plan.
- Opportunities coming from sponsorship.

Program Plan

Institutional Engagement

- Building connections is a quick process, but **establishing deep trust** takes time.
- **ADCO** group is in its early stages; actively working to secure meeting slots.
- **ENISA** relationship is built on attestations and SBOMs; discussing their role in Code and Compliance.
- **Verticals engagement is a low-resource, high-impact** communication effort to recruit partners. Also working on partnering for Code and Compliance.

Community Representation

Pipeline is driven by event connections and inbound website inquiries.

Regulations & New Markets

Developing local chapters to cultivate and expand regional communities.
A priority to consider, how to better deliver the lessons learned.

FAQ Promotion Plan

Combining FAQ and training for paid ads (23K+ FAQ visitors to date).

ORC Community Representation

Program Objective	Corresponding Strategies and Tactics	2026 Objectives
Building legitimacy through broad stakeholder representation, growing ORC WG membership base.	• Address internal stakeholders groups to promote WG results and engage new entities in the ORC WG activities. • Development of events to promote WG activities focusing on raising awareness within the Open Source Community of the impact of the regulation. • Stakeholder surveys and feedback mechanisms to engage deeper with the WG members and relevant stakeholders. • Broaden diversity of membership. • Build cooperation with relevant stakeholder organizations.	• Engage with new members in the Working Group targeting 120 in total and double the membership revenue of the WG. - Behind the plan • Establish active cooperation with other business associations that are focused on industry verticals to support them in understanding the impact of the regulation when consuming open source. - Working with automotive and Rail road, starting to cooperated with home appliances. • Cooperate closely with other Open Source groups working on similar topics to maximize the impact of our activities and avoid overlaps (OpenSSF, FSFE....) - FSFE in attestations

Key activities and expected roles

	Eclipse Foundation	WG Members	Open Source Community
Awareness, education and thought leadership	Coordination and leadership of the FAQ development and training materials. Organization of the WG events (in person and virtual). Coordinate marketing and promotion around the events the members are participating.	Actively contribute to the FAQ, share concerns and questions and review content to consolidate community consensus. Review training materials and contribute to them. Be active participants in the ORC events Contribute speaker ideas for ORC events Promote ORC work at events	Contribute to the FAQs Benefiting from the speaking opportunities at ORC events
Technical development	Coordination and leadership of the attestation work. Support of the due diligence activities in parallel to the attestation. Support specification work and eventually lead some streams. Coordinate WG channels as an space for communicating standardization activities and opportunities for the open source community. Coordinate the responses to public consultations	Contribute to the attestation work providing inputs and feedback. Lead the technical work on due diligence with the continuous support from the EF Coordination Actively contribute to the specifications planned by the WG. Share and support the internal coordination with regards to the standardisation activities	Engage in those technical activities that match their interests.
Institutional engagement	Lead the interactions as a group with the different institutions (EC, ENISA, National bodies)	Support the WG activities and require support when connecting with the National Authorities in responsibilities and powers in market surveillance	
Community representation	Lead active recruitment of new members Develop relationship with industrial associations	Lead relationship with other stakeholder groups like openSSF Help the EF to recruit new members for the WG Engage as WG ambassadors	Propose links to associations or groups with similar interests Engage as WG ambassadors

Code and Compliance

Code and Compliance

27th of October 2026

Brussels - Maison de la Poste

Theme proposal

Code and Compliance - **"The blueprint for trust.** Building secure and compliant horizons"

The idea is to explore how to move from regulation to operational trust, and capitalize on the concept of trust as the enabler for new professional relationships that can create:

- Secure and compliant products.
- Stronger and more resilient ecosystems.
- Compliant open source cooperation as innovation catalyst.

Objectives

- Present ORC as the reference community to engage with and the practical implementation hub to check for compliance when using and producing open source software.
- Bring non-IT industries to the event to show
 - The value of open source as innovation driver.
 - The compliance path to use it.
 - Bridge policy, engineering and operational compliance realities.
 - The cooperation opportunities that are possible to exploit under the Eclipse Foundation industry collaboration model.

Target audience and key relationships

Target audience:

- **Fall event should focus mainly on industry**, those who are consuming open source and don't know how to effectively deal with it.
- FOSDEM is for the open source community
- This split makes the distance between the two editions less relevant.

Key relationships:

- **All industry associations based in Brussels (UNIFE, Applia, Orgalim, ERTICO, ECSO).**
- Collect inputs from them on what are the main struggles they have with current regulations.
- Bring speakers from their side - work together in cross community promotion.

Program draft (one day event) - 90 min per block

Early morning Set up the scene

- Welcome
- The regulatory landscape:
 - Existing regulations
 - Challenges
- Authorities (EC, ESOs?, ENISA)

Before lunch Security at the core

- Secure practices of open source projects and communities.
- Compliance by default
- Open source + safe development practices
- Attestations
- Vulnerability reporting

After lunch Compliance in the age of AI

- ORC approach to AI
- Practical cases of the use of AI
- Interplay of regulations
- Glasswing project

After coffee break Innovation catalyst

- Open innovation and cooperation creating industry impact
- The role of governance in open cooperation
- Panel with the industry
- Invitation to follow-up

CRA Expert Group and CRA Standardisation

CRA Expert Group

Policy & Guidance

Guidance Package Update

Coming soon (not public yet).
Incorporates most of our comments.

- Section 4: Substantial modification & Spare parts
- Section 5: Supporting period
- Section 9: Vulnerability reporting

Regulatory Interplay

- **AI Act:** Interaction next steps to be defined
- **DORA:** Included as part of the work

ENISA Updates

Single Reporting Platform

Launch: Sept 11. Stewards must report active exploits (no API available yet).

- Testing: Apache next week, Eclipse mid-July
- Manufacturers will also get access

SBOM & SME Support

- **SBOMs:** Guidance workstrand initiated; call open
- **SME Survey:** 192 responses; likely biased towards "own bubble"

Tools & Standards

CRA Compliance Tools

Various tools funded but status remains unclear. Focus topic for the next EG meeting.

Notified Bodies

Work is ongoing; ENISA has published the key requirements.

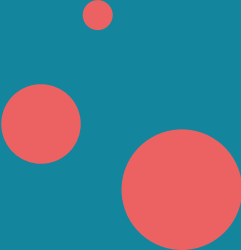

Cybersecurity Labelling

Global Cybersecurity Labelling Initiative is fostering international alignment.
